TAN THANH CONG TECHNOLOGY CONSTRUCTION JOINT STOCK COMPANY

Business name	TAN THANH CONG TECHNOLOGY CONSTRUCTION JOINT STOCK COMPANY
Legal representative	Mr. PHAM HUY TAN — Chief Executive Officer
Registered office	No. 39, Lane 292 Kim Giang, Dai Kim, Hanoi
Contact	+84 976 447 766 • info@tanthanhhongjsc.com

Tax Identification Number	0107090447
Competencies	Construction capacity certificate Class II • ISO Management System
Transaction office	No. 19N7B, Urban area Trung Hoa Nhan Chinh, Hanoi
Website	tanthanhhongjsc.com

Key Terminology: EPC – Design, Procurement and Construction; PEB – Pre-engineered Steel Building; MEP – M&E; BIM – Building Information Modeling;

QA/QC – Assurance and Control of quality; HSE – Safety, Health and Environment; Fire Protection – Fire Prevention & Fighting; ITP – Inspection and Acceptance Plan.

Message from the CEO

Leadership Message — Building Trust Through Every Commitment

TTC'S ENDURING MESSAGE

**“QUALITY IS OUR HONOUR.
SAFETY IS OUR LIFELINE.
WE DELIVER AS PROMISED.”**

Dear Clients and Partners,

On behalf of the Board of Directors and all employees of **Tan Thanh Cong Technology Construction Joint Stock Company**, I sincerely thank you for your trust and partnership throughout TTC's development journey.

More than a decade in industrial construction has taught us that every successful project must achieve **quality, safety, schedule and investment efficiency**. Tan Thanh Cong therefore operates through **a single point of responsibility for design–procurement–construction**, supported by value engineering, building information modelling and disciplined site management.

Through our steel-fabrication partner network and experienced field engineers, we provide fit-for-purpose solutions with transparent control from design and construction through handover and warranty.

TTC aims to be more than a contractor: a **long-term value-creation partner** for every client and every project.

Sincerely,

CHIEF EXECUTIVE OFFICER / CEO

PHAM HUY TAN

Time-Based Status

EPC Governance Through Four Control Phases

FIDIC Turnkey Governance, Decision Gates & Single-Point Accountability

EACH PHASE WITH OUTPUT • EACH PHASE TRANSITION WITH APPROVAL

The eight steps of implementation are grouped into four governance phases, helping Client to clearly see the decision, responsibility and status of the project.

GOVERNANCE SPINE — A GOVERNANCE SYSTEM THROUGHOUT

Value-Creating EPC Delivery Model

Fast-Track Delivery, Value Engineering & Single-Point Accountability

FASTER • LEANER • LESS RISKY

TTC integrates legal, design, procurement and construction in one contract — all decisions together towards the final investment efficiency.

SIX WORKFLOWS — ONE VALUE CHAIN

01 • DESIGN LESS

STRUCTURAL OPTIMIZATION

Tapered beams according to internal force, reducing the load to the foundation and preserving the safety coefficient.

02 • BUILD EARLIER

PARALLEL RUN

Design, processing PEB and foundation at the same time according to the critical path.

03 • CONTROL RISK

LOCK RANGE

BIM clash-check, release gate and Lump-sum contract limit arising.

COST OPTIMIZATION

Value Engineering

SONG SONG

Controlled Fast-Track

CLASH CHECK

Model Coordination

CHANGE CONTROL

Scope Discipline

One Data Flow Across the Facility Lifecycle

Building Information Modeling, Engineering Review & Handover Data

A MODEL • THREE DECISIONS • THROUGHOUT THE LIFE CYCLE

Design data does not stop at drawings: it leads the procurement, construction, inspection and acceptance and operation of assets.

01 / COORDINATE

BIM 5D

Input: Architecture • Structure • MEP

Decision: Clash-check and sequence

Output: Shop Drawing, BOQ, 4D plan

TEKLA • REVIT • NAVISWORKS

02 / OPTIMIZE

Green Factories Designed as a Business Case

Solar-Ready, Low-Energy Envelope, Water Circularity & Green Certification

DECREASE IN OPEX • CARBON READINESS • INCREASE IN ASSET VALUE

ESG is built from structural and enclosure — not costly replenishment once the plant is up and running.

01 / ENERGY

SOLAR-READY

Provision for roof loading, purlins and installation interface according to approved battery system data.

02 / ENVELOPE

COOL ROOF

PIR/Rockwool panel and HVAC load-reducing heat-reflective roof.

03 / WATER

CIRCULARITY

Column A wastewater, rainwater collection and reuse for the landscape.

04 / STANDARD

LEED / LOTUS

Energy simulation, Low-VOC materials and certification records.

VALUE FOR INTERNATIONAL INVESTORS

GREEN FINANCE

Increase access to green capital and international supply chain criteria.

CARBON READY

Prepare energy data, materials and emission reduction pathways as required by the project.

LOWER OPEX

Reduce HVAC power, optimize operating water and increase the value of asset exploitation.

SOLAR-READY

Approved System Data

LOW-ENERGY

Envelope Strategy

WATER

Project Requirements

GREEN DOSSIER

Certification Support

Digital Site Control Centre

Centralized data • Instant alerts • Retrievable records

ONE SITE • THREE DATA SOURCES • OPERATING ONE CONTRACT

Gather human data, safety and construction documents for the Site Manager to handle the right work at the right time.

INFORMATION SUFFICIENT FOR DECISION MAKING

TROOPS READY

Know who is at the construction site and the entry conditions of each person.

SAFETY FULL VIEW

PPE violation and hazardous zone intrusion alerts for immediate processing.

FULL COMPANY

Diary, RFI and ITP records with time, approver and evidence.

ACTION LOOP OF THE DAY

A Quality Passport for Every Work Package

Four-level ITP control • Enough evidence to move forward

ONLY MOVE FORWARD WHEN THERE IS SUFFICIENT EVIDENCE

Each material, weld and item is inspected, signed and traced prior to release for the next step.

Safety Is a Decision System — Not Just PPE

Risk Elimination, Daily Control Cycle & Stop Work Authority

SEES THE RISK • PRE-CONTROLS THE • STOPS WHEN SAFETY IS NOT SAFE

Progress is never a reason to accept an uncontrolled working condition.

STOP WORK AUTHORITY

STOP WORK

Anyone has the right to stop work when the safety condition is incomplete.

PEOPLE BEFORE PRODUCTION

RISK CONTROL PRIORITY ORDER

01 • ELIMINATE — Eliminate the risk immediately from the measure

02 • ENGINEER — Barrier, working platform, fall protection

03 • PERMITS — JSA, licenses and supervisors

04 • PPE — Final protective layer

DAILY SAFETY CONTROL CYCLE

ANTI-VIBRATION

FOR CNC MACHINE SETS

Client: 2M Vietnam Technology Joint Stock Company (2M TECHNOCOM., JSC)
• Implementing unit: Tan Thanh Cong JSC – steel structure design, construction consultancy, bearing floor and technical infrastructure.

PROJECT STORY • ONLY KEEP THE THREE MAIN POINTS

01

PROBLEM

Client needs to build a factory to produce high-precision molds and technical components, requiring a stable anti-vibration workshop floor for CNC machines & plastic injection molding machine.

02

TTC SOLUTIONS

Consulting on optimal design of ventilated workshop rhythm; strengthening the foundation & the concrete floor is subjected to anti-vibration load; synchronous integration of MEP system, lighting and transformer station of the industrial park.

03

RESULTS

Handing over the completed works in accordance with schedule, meeting the strict technical standards of the high-tech mold manufacturing industry, putting them into effective operation.

THREE POINTS FOR READERS TO REMEMBER

ANTI-VIBRATION

REINFORCED FLOOR
FOR CNC MACHINE SETS

PACKAGE GENERAL CONTRACTOR

EPC GENERAL CONTRACTOR

ALO PAINT COMBINATION

CLUSTER OF 4 WORKSHOPS & CHEMICAL STORAGE

Client: ALO Vietnam Investment Joint Stock Company
Location: Lot CN1, Phu Nghia Industrial Park, Hanoi
Standard (s): Fire safety & Chemical resistance
Tan Thanh Cong JSC: EPC General Contractor (Design & Construction)

PRINCIPLE DIAGRAM • SAFETY SOLUTION WITH FULL EXPLOSION & CHEMICAL RESISTANCE

01 • DEDICATED FIRE PROTECTION

Foam fire fighting system and solutions to prevent fire spread according to approved documents.

02 • CORROSION RESISTANT FLOOR

Epoxy-coated reinforced concrete is resistant to solvents and chemicals according to operating requirements.

03 • EPC PROGRESS

Handing over the synchronous package of production workshops, warehouses and operating areas.

CORE VALUES: SAFETY FULL CHEMICAL EXPLOSION • DURABLE FLOOR CORROSION RESISTANCE

Project Profile 03: Manufacturing Plant Sendai Plastic Vietnam

High-tech plastics manufacturing plant • Injection molding facility • Industrial Park No. 3, Hung Yen

GENERAL CONTRACTOR

SENDAI PLASTIC ASSEMBLY

CLUSTER OF 2 WORKSHOPS & OFFICE BLOCK

Client: Sendai Vietnam Plastic Joint Stock Company
Location: Lot C7, Industrial Park No. 3, An Thi, Hung Yen
Scale: 2 Extrusion workshop & 3-storey office building
Tan Thanh Cong JSC: General contractor for construction & MEP

PRINCIPLE DIAGRAM • PLASTIC INJECTION MOLDING LINE & MEP BACKEND SYSTEM

3 TECHNICAL DECISIONS

01 • Press-loaded floor

High-grade reinforced concrete prevents misalignment settlement and suppresses machine vibration.

02 • Chiller Infrastructure

Closed circulating cooling water network feeds directly to each mold.

03 • Complex of 2 workshops & VP

Internal traffic planning connects smoothly between the workshop and the operation.

01 • TECHNICAL INJECTION MOLDING

The large aperture workshop integrates the crane to replace the mold according to the equipment data.

02 • MEP COOLING

Cooling chiller system, central compressed air and synchronous power station.

03 • PROGRESS OF GENERAL CONTRACTOR

Package construction of 2 production workshops, warehouse and 3-storey office block.

CORE VALUES: TECHNICAL PLASTIC PRODUCTION INFRASTRUCTURE • SYNCHRONOUS MEP AUXILIARY SYSTEM

Project Profile 04: Factory Complex Lao Cai

Multi-storey garment manufacturing complex • Negative pressure cooling • New Street, Lao Cai City

DESIGN CONSULTANCY & CONSTRUCTION

LAO CAI GARMENT FACTORY

COMPLEX OF 3 BLOCKS OF 5-STOREY FACTORY

Client: Lao Cai Garment Company

Location: New Street, Lao Cai City

Scale: 3 5-storey workshop block • Import and export area

Tan Thanh Cong JSC: Architectural design & General Contractor

PRINCIPLE DIAGRAM • HIGH-RISE GARMENT FACTORY & SOUND PRESSURE MICROCLIMATE

01 • HIGH-RISE GARMENT FACTORY

The complex of 3 blocks of 5 floors optimizes the density of land use and the arrangement of lines.

02 • TEXTILE CLIMATE

Negative pressure cooling, cotton dust filtration and fresh air supply meet export audit standards.

03 • GENERAL CONTRACTOR D&B

Consulting on architectural design, composite structure and complete construction of the package.

CORE VALUES: HIGH-RISE FACTORY SOLUTIONS • STANDARD WORKING ENVIRONMENT FOR EXPORT

Project Profile 05: Manufacturing Plant DHL Plastic

High-grade plastic packaging plant • PE/PP film extrusion • Thai Ha Industrial Park, Ha Nam

GENERAL CONTRACTOR

DHL PLASTIC FACTORY

FACTORY COMPLEX & OFFICE BLOCK

Client: DHL Plastic Group Joint Stock Company

Location: Lot CN02, Thai Ha Industrial Park, Ha Nam

Scale: PE/PP Film Workshop Complex & 3-storey office

Tan Thanh Cong JSC: PEB General Contractor & Electromechanical MEP

PRINCIPLE DIAGRAM • PLASTIC FILM BLOWING EXTRUSION LINE & MEP BACKEND SYSTEM

3 TECHNICAL DECISIONS

01 • Crossing the cascading span
pre-engineered steel building large aperture frame integrates a cascade chamber for the extrusion tower.

02 • Extruded chiller infrastructure
The circulating cold water system keeps the temperature stable and the thin film stable.

03 • Hardener floor under load
The grinding concrete surface is hardened, dustproof and designed according to the fork-lift load.

01 • WORKSHOP COMPLEX & VP

Modern 3-storey glass office block combined with large-scale film blowing extrusion workshop.

02 • HIGH POWER MEP

Integrated substation, extruder cooling chiller tower and central compressed air synchronously.

03 • ACTUAL HANDOVER

Accurate construction, inspection and acceptance of safety fire prevention and fighting and put into commercial operation by 2025.

CORE VALUES: HIGH-GRADE PLASTIC PACKAGING PRODUCTION INFRASTRUCTURE • ACTUAL HANDOVER QUALITY

Project Profile 06: Manufacturing Plant Quang Thinh Aluminum

High-grade aluminum profiles plant • Heavy extrusion lines • Thuan Thanh, Bac Ninh

FINANCIAL

DUE DILIGENCE

INDEXED INFORMATION • CONTROLLED COPY • EASY TO RECONCILE

Presence Along Vietnam's Key Industrial Corridors

Northern manufacturing belt • Central corridor • Southern FDI and logistics cluster

PROJECT DELIVERY EXPERIENCE ACROSS VIETNAM

Highlights reflect the cluster of areas appearing in the project list; do not represent the number of projects in proportion.

01 • CURRENT DEDICATION WEIGHT

NORTHERN INDUSTRIAL BELT

The project density is high around Hanoi, Vinh Phuc, Bac Ninh, Bac Giang, Hai Duong, Hai Phong and Nam Dinh industrial zones.

02 • PROFILE MOBILE

TEAM BY PROJECT CLUSTER

Arrange project management, QA/QC and HSE according to the area; the equipment mobilization plan is locked according to each work package.

03 • DIRECTION EXPAND

Selective expansion in the Central and the South, prioritizing projects that require industrial EPC, logistics and high-tech factories.

PROJECT FOOTPRINT 3 DEPLOYMENT CLUSTERS

Selective & Sustainable Development Roadmap

Controlled development • Repeat clients • High-tech capability • Delivery discipline

EXPAND ONLY WHEN GOVERNANCE IS READY

Prioritize delivery capability, repeat clients and governance quality before the pace of expansion.

FOUR FILTERS BEFORE SCALING

The roadmap is oriented; step by step expansion depends on capacity, market demand and governance approval.

CONTROLLED GROWTH

HANDOVER QUALITY IS MORE IMPORTANT THAN SPEED

Single-Point Post-Handover Support

Centralized intake • Contract-based response • Field verification • Closed-loop records

HANDOVER IS NOT THE END

All requirements after handover are recorded, classified, processed and closed by the same chain of responsibility.

WARRANTY CONDITIONS

THEO CONTRACT

Term and scope established in each contract

ONE CONTRACT RECEIVING — ONE COMPANY FOLLOWING
