Key Terminology: EPC – Engineering, Procurement & Construction; PEB – Pre-Engineered Building; MEP – Mechanical, Electrical & Plumbing; BIM – Building Information Modeling;

QA/QC – Quality Assurance / Quality Control; HSE – Health, Safety & Environment; FPS – Fire Protection System; ITP – Inspection & Test Plan.

Message from the CEO

Leadership Message — Building Trust Through Every Commitment

TTC'S ENDURING MESSAGE

**“QUALITY IS OUR HONOUR.
SAFETY IS OUR LIFELINE.
WE DELIVER AS PROMISED.”**

Dear Clients and Partners,

On behalf of the Board of Directors and all employees of **Tan Thanh Cong Technology Construction Joint Stock Company**, I sincerely thank you for your trust and partnership throughout TTC's development journey.

More than a decade in industrial construction has taught us that every successful project must achieve **quality, safety, schedule and investment efficiency**. Tan Thanh Cong therefore operates through **a single point of responsibility for design–procurement–construction**, supported by value engineering, building information modelling and disciplined site management.

Through our steel-fabrication partner network and experienced field engineers, we provide fit-for-purpose solutions with transparent control from design and construction through handover and warranty.

TTC aims to be more than a contractor: a **long-term value-creation partner** for every client and every project.

Sincerely,

CHIEF EXECUTIVE OFFICER / CEO

PHAM HUY TAN

CONTROL BEFORE COMMITMENT

Only commit when budgeted & approved cash flow

CONTROL PRINCIPLE

NO COMMITMENT BEYOND CAPACITY

✓ Budget Lock: Approval before re-source mobilization.

✓ Variation control: All scope changes and cost variances strictly pre-approved.

✓ Prudent growth: Capacity only expands when handover standards are secured.

EACH PROJECT HAS ITS OWN COST CODE

COST CONTROL

- Establish a baseline budget according to the WBS.
- Report weekly expense variance.
- Forecast of total cost of completion (EAC).

RECEIVABLE CONTROL

DEBT CONTROL

- Closely follow the inspection plan.
- Payment cash flow tracking & advance payment.
- Strictly administer the warranty retention.

VERIFIED REPORTING

TRACEABLE RECORDS

- Cost data updated on each governance cycle.
- Variance analysis and Estimate-at-Completion (EAC).
- Detailed documentation provided upon Client request.

DISCLOSURE POLICY

CONTROLLED TRANSPARENCY

EPC Governance Through Four Control Phases

FIDIC Turnkey Governance, Decision Gates & Single-Point Accountability

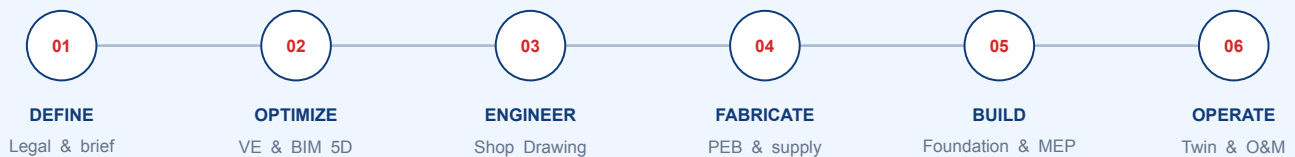

EACH PHASE WITH OUTPUT • EACH PHASE TRANSITION WITH AP-
PROVAL

The eight delivery steps are structured into four governance phases, providing Clients with clear visibility over decisions, responsibilities, and project milestones.

Fast-Track Delivery, Value Engineering & Single-Point Accountability

TTC integrates legal, design, procurement and construction in one contract — all decisions together towards the final investment efficiency.

 **SIX WORKFLOWS — ONE VALUE CHAIN**

01 • DESIGN LESS

STRUCTURAL OPTIMIZATION

Tapered beams according to internal force, reducing the load to the foundation and preserving the safety coefficient.

02 • BUILD EARLIER

PARALLEL RUN

Design, processing PEB and foundation at the same time according to the critical path.

03 • CONTROL RISK

SCOPE FREEZE

BIM clash-check, staged release gates, and lump-sum contracting minimize scope variations.

COST OPTIMIZATION

Tan Thanh Cong JSC: General contractor for construction & MEP

PRINCIPLE DIAGRAM • PLASTIC INJECTION MOLDING LINE & MEP BACKEND SYSTEM

3 TECHNICAL DECISIONS

01 • Press-loaded floor

High-grade reinforced concrete prevents misalignment settlement and suppresses machine vibration.

02 • Chiller Infrastructure

Closed circulating cooling water network feeds directly to each mold.

03 • Two workshops & office

Internal traffic planning connects smoothly between the workshop and the operation.

01 • TECHNICAL INJECTION MOLDING

Clear-span production hall integrated with overhead cranes for mold changeover per equipment specs.

02 • MEP COOLING

Cooling chiller system, central compressed air and synchronous power station.

03 • TURNKEY DELIVERY

Package construction of 2 production workshops, warehouse and 3-storey office block.

CORE VALUES: TECHNICAL PLASTIC PRODUCTION INFRASTRUCTURE • SYNCHRONOUS MEP AUXILIARY SYSTEM

Project Profile 04: Lao Cai Garment Manufacturing Complex

Multi-storey garment manufacturing complex • Negative pressure cooling • New Street, Lao Cai City

DESIGN CONSULTANCY & CONSTRUCTION

LAO CAI GARMENT FACTORY

COMPLEX OF 3 BLOCKS OF 5-STOREY FACTORY

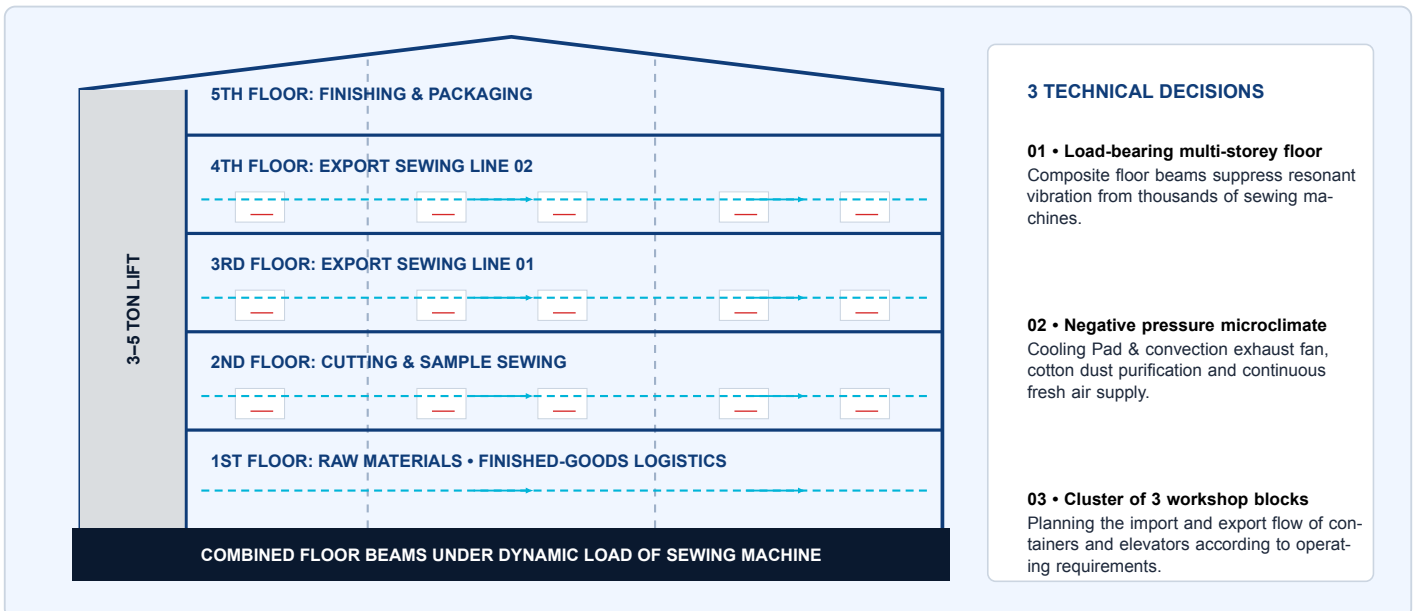

Client: Lao Cai Garment Company

Location: New Street, Lao Cai City

Scale: Three 5-storey factory blocks • Logistics & loading bays

Tan Thanh Cong JSC: Architectural design & General Contractor

PRINCIPLE DIAGRAM • HIGH-RISE GARMENT FACTORY & SOUND PRESSURE MICROCLIMATE

01 • HIGH-RISE GARMENT FACTORY

The complex of 3 blocks of 5 floors optimizes the density of land use and the arrangement of lines.

02 • TEXTILE CLIMATE

Negative pressure cooling, cotton dust filtration and fresh air supply meet export audit standards.

03 • GENERAL CONTRACTOR D&B

Consulting on architectural design, composite structure and complete construction of the package.

CORE VALUES: HIGH-RISE FACTORY SOLUTIONS • STANDARD WORKING ENVIRONMENT FOR EXPORT

Project Profile 05: DHL Plastics Factory

PE/PP packaging film • Blown-film extrusion • Thai Ha Industrial Park, Ha Nam

GENERAL CONTRACTOR

DHL PLASTIC FACTORY

FACTORY COMPLEX & OFFICE BLOCK

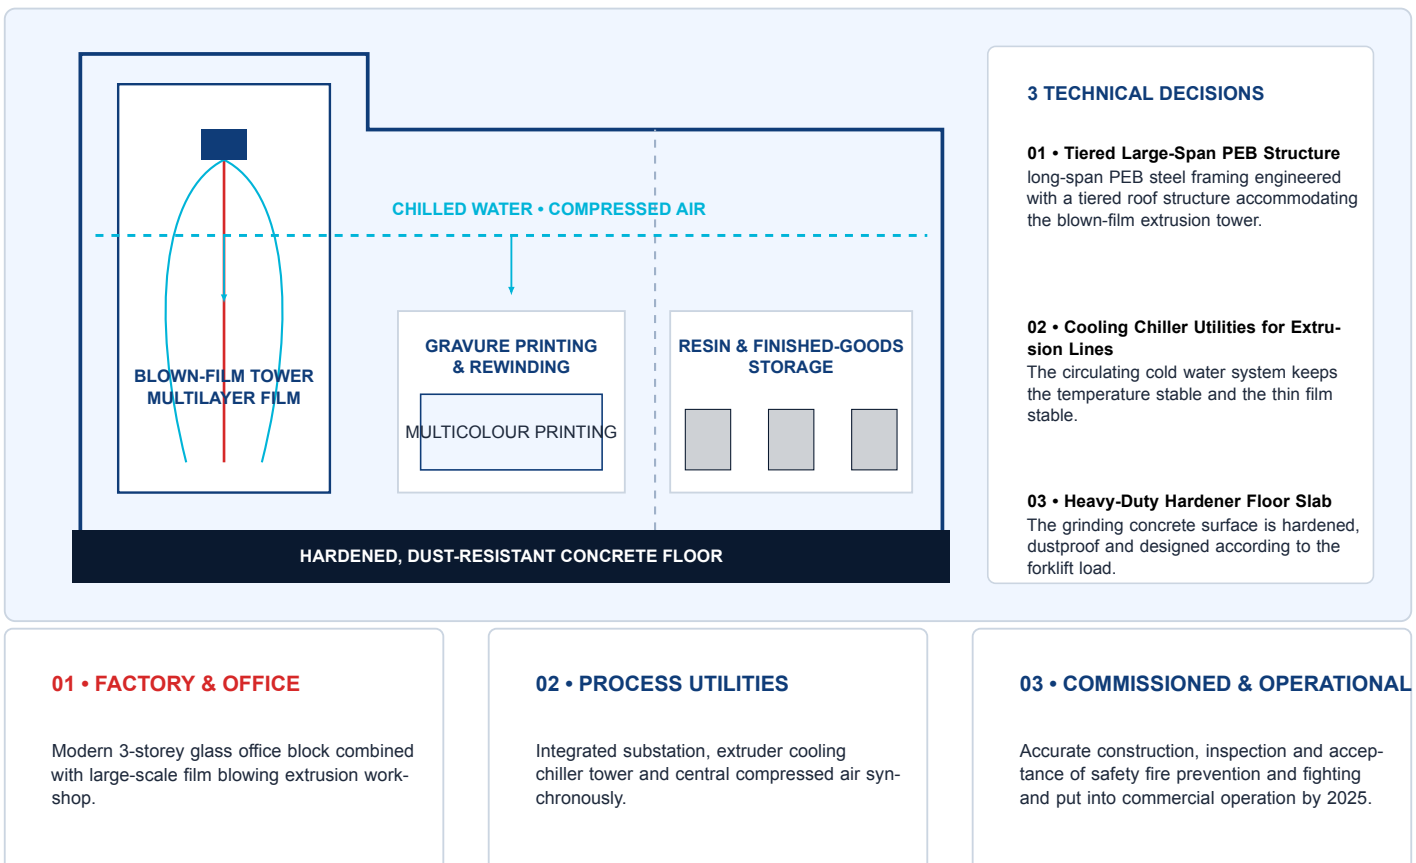

Client: DHL Plastic Group Joint Stock Company

Location: Lot CN02, Thai Ha Industrial Park, Ha Nam

Scale: PE/PP Film Workshop Complex & 3-storey office

HVAC & FIRE PROTECTION

Daikin • Grundfos • Tyco

Control: Submittal • UL-FM upon request

THREE LAYERS OF PROTECTION BEFORE INSTALLATION

01

CORRECT SOURCE

Approval documents matching manufacturer and origin

02

COMPLIANT QUALITY

Specimen matching specifications and project standards

03

CORRECT LOCATION

Each lot associated with the minutes and the area of use

MATERIAL ASSURANCE

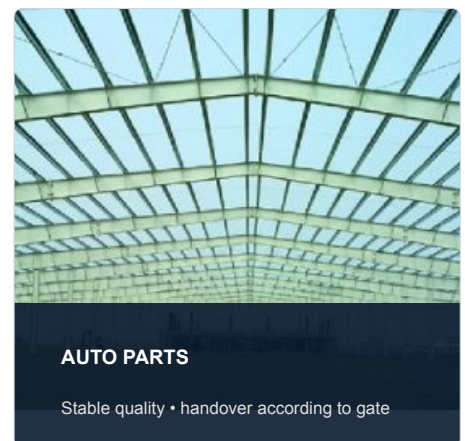

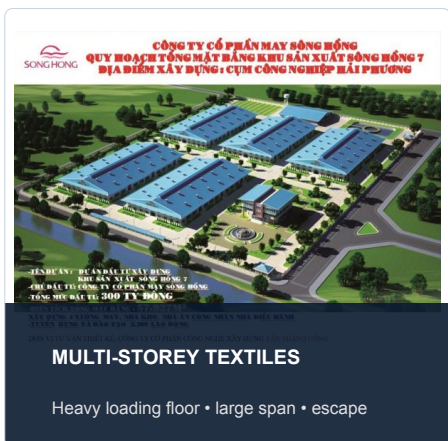

APPROVED SOURCE → VERIFIED LOT → TRACEABLE INSTALLATION

Six Facility Types — One Integrated Capability

Representative sectors • Different operating demands • One coordinated EPC workflow

DESIGN STARTS WITH HOW THE PLANT OPERATES

Each industry group has a core risk; the structural solution, MEP and construction sequence must answer that risk correctly.

CROSS-SECTOR CORE CAPABILITIES

COORDINATION

architectural interface key • structure • MEP

CONSTRUCTABILITY

Design following construction methods and sequence

CLOSEOUT INTEGRITY

Sufficient evidence before each transfer step

SECTOR FIT

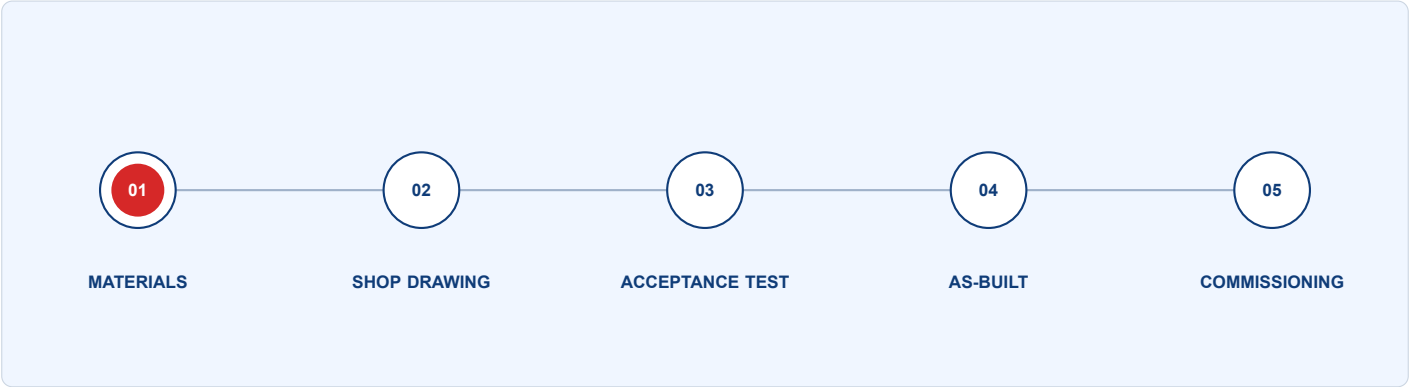

TAILORED SOLUTION FOR OPERATIONAL NEEDS

Traceable Handover Dossier

Evidence chain from approved material to as-built and commissioning records

HANDOVER THE FACILITY — AND THE EVIDENCE

Each step is closed only when the technical documents, minutes and field evidence have matched.

CLOSEOUT DOSSIER

AS-BUILT DOSSIER

CDE index • revision • approval

01 MASTER INDEX • COMPREHENSIVE DOSSIER SUITE

MINIMUM HANDOVER STRUCTURE

01

MATERIAL DOSSIER

Approved submittals • CO

02

CONSTRUCTION QA

QC

03

AS-BUILT DOSSIER

As-built drawings • redline revisions • engineer approval

04

O&M HANDOVER

O&M manuals • manufacturer warranties • asset registers

ISSUANCE GUIDELINES

RELEASE CONTROL

Single authorized revision • Unified handover index

INSPECTED → FULLY VERIFIED → APPROVED → TRACEABLE

Due-Diligence-Ready Corporate Records

Corporate identity • Construction capability • ISO systems • Key-person credentials

ONE DOSSIER — FOUR VERIFIABLE CAPABILITY LAYERS

The legal entity information, scope of activities and management system are organized in accordance with the logic of the contractor appraisal round.

CORPORATE IDENTITY

TAN THANH CONG
TECHNOLOGY CON-
STRUCTION
JOINT STOCK COMPANY

Abbreviated name: TTC JSC

Tax code: 0107090447

Headquarters: Hanoi, Vietnam

Scope: Industrial general contractor, steel struc-
ture, M&E and project management

LEGAL • TRACEABLE • BID-READY

01

CONSTRUCTION CAPABILITY

The scope of work is directly reconciled according to the valid certificate;
a copy is provided in the legal documents.

02

ISO MANAGEMENT SYSTEMS

ISO 9001 • ISO 14001 • ISO 45001 presented with the same scope of
application and audit period.

03

KEY PERSONNEL

Practicing certificate of Project Manager • Site Manager • design lead.

04

COMMERCIAL & STATUTORY

Enterprise registration • tax • bank • insurance • bid form.

INDEX SET FOR PREQUALIFICATION /BIDDING

LEGAL ENTITY

CAPABILITY

ISO

HR

FINANCIAL

DUE DILIGENCE

INDEXED INFORMATION • CONTROLLED COPY • EASY TO RECONCILE

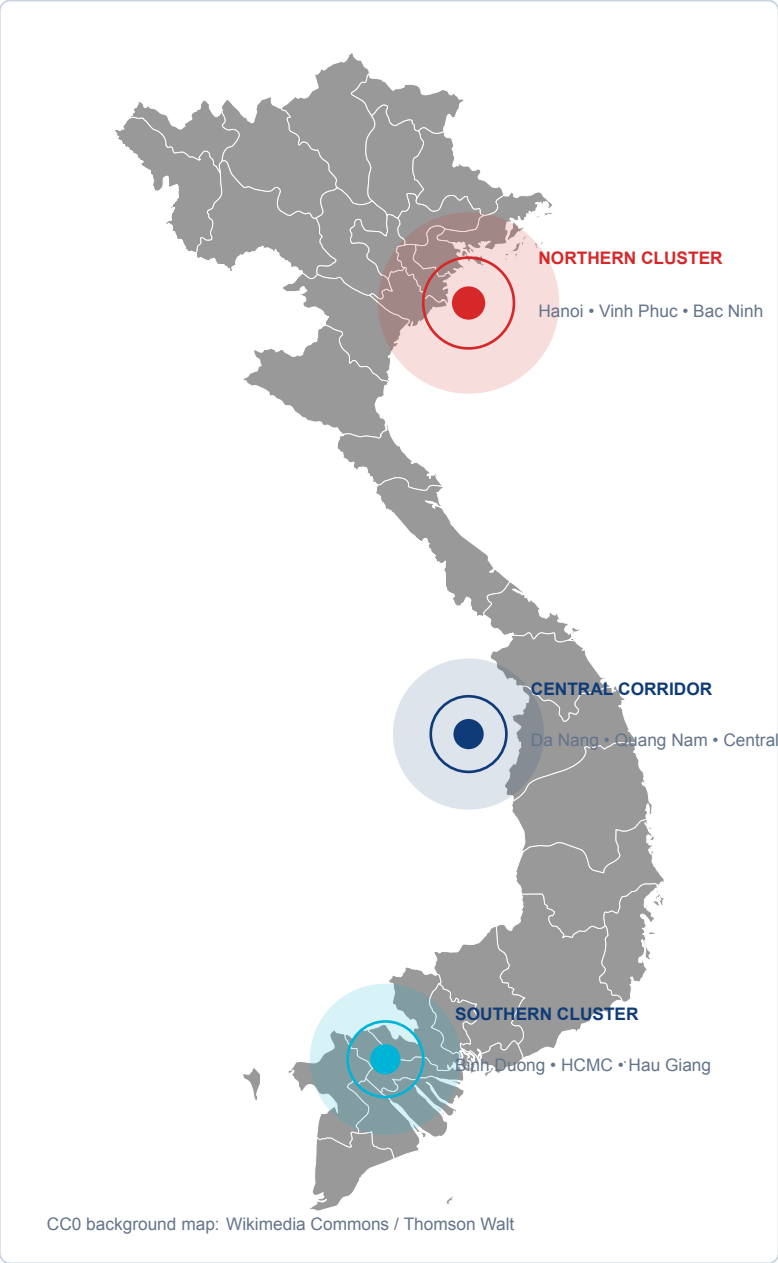

Presence Along Vietnam’s Key Industrial Corridors

Northern manufacturing belt • Central corridor • Southern FDI and logistics cluster

PROJECT DELIVERY EXPERIENCE ACROSS VIETNAM

Highlights reflect the cluster of areas appearing in the project list; do not represent the number of projects in proportion.

01 • STRATEGIC CORE REGION

NORTHERN INDUSTRIAL BELT

The project density is high around Hanoi, Vinh Phuc, Bac Ninh, Bac Giang, Hai Duong, Hai Phong and Nam Dinh industrial zones.

02 • REGIONAL MOBILIZATION CAPABILITY

TEAM BY PROJECT CLUSTER

Arrange project management, QA/QC and HSE according to the area; the equipment mobilization plan is locked according to each work package.

03 • EXPANSION STRATEGY

Selective expansion in the Central and the South, prioritizing projects that require industrial EPC, logistics and high-tech factories.

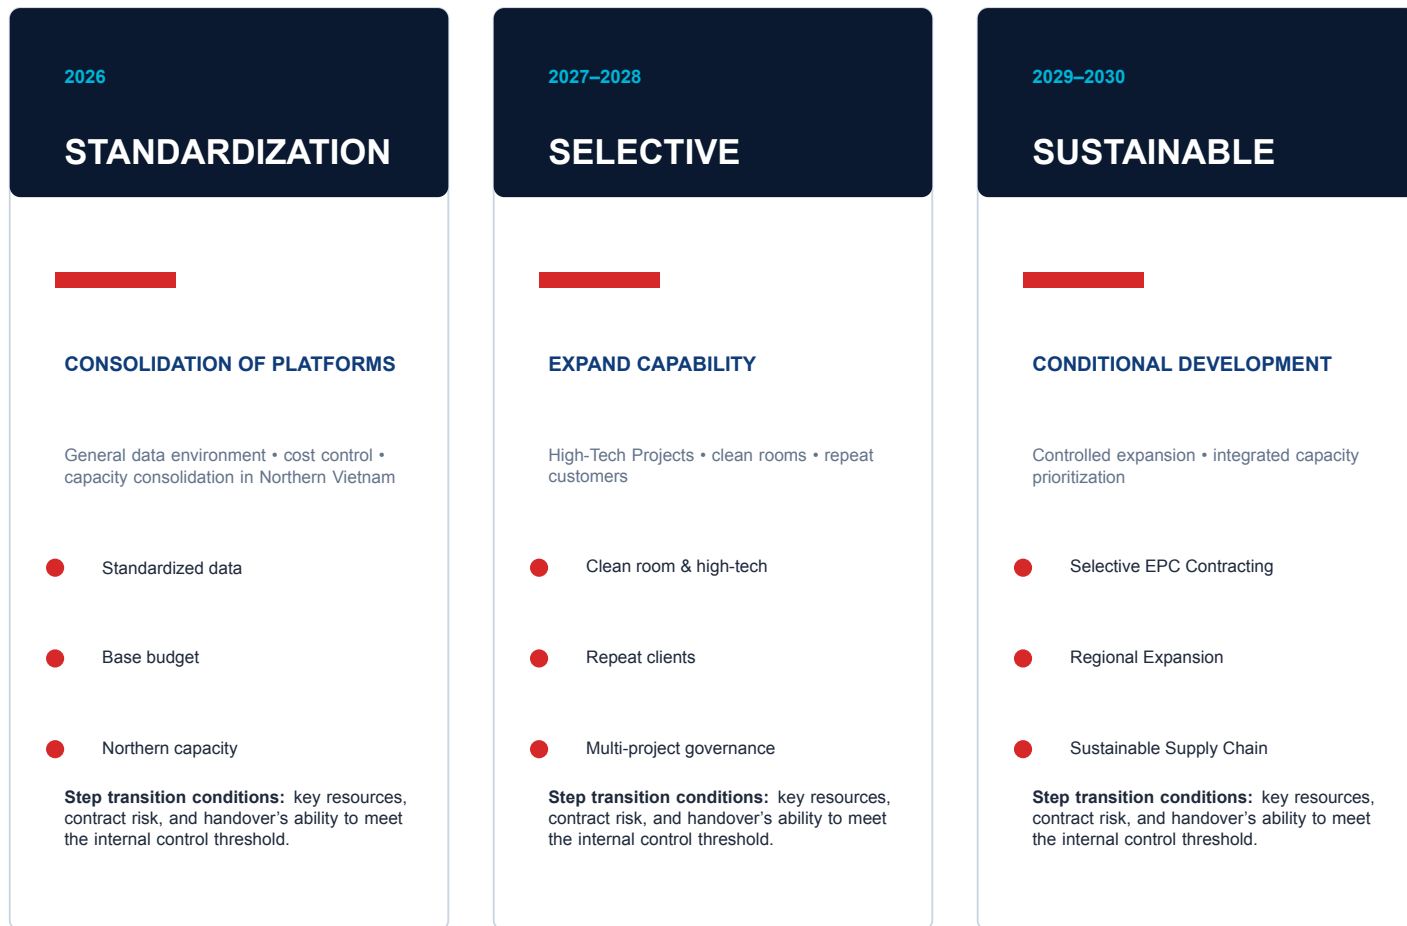

PROJECT FOOTPRINT 3 DEPLOYMENT CLUSTERS

Selective & Sustainable Development Roadmap

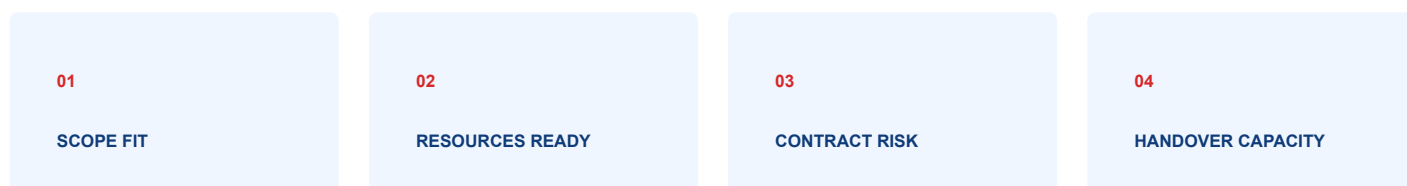

Controlled development • Repeat clients • High-tech capability • Delivery discipline

EXPAND ONLY WHEN GOVERNANCE IS READY

Prioritize delivery capability, repeat clients and governance quality before the pace of expansion.

FOUR FILTERS BEFORE SCALING

The roadmap is oriented; step by step expansion depends on capacity, market demand and governance approval.

CONTROLLED GROWTH

HANDOVER QUALITY IS MORE IMPORTANT THAN SPEED

Single-Point Post-Handover Support

Centralized intake • Contract-based response • Field verification • Closed-loop records

HANDOVER IS NOT THE END

All requirements after handover are recorded, classified, processed and closed by the same chain of responsibility.

WARRANTY CONDITIONS

CONTRACT BASED

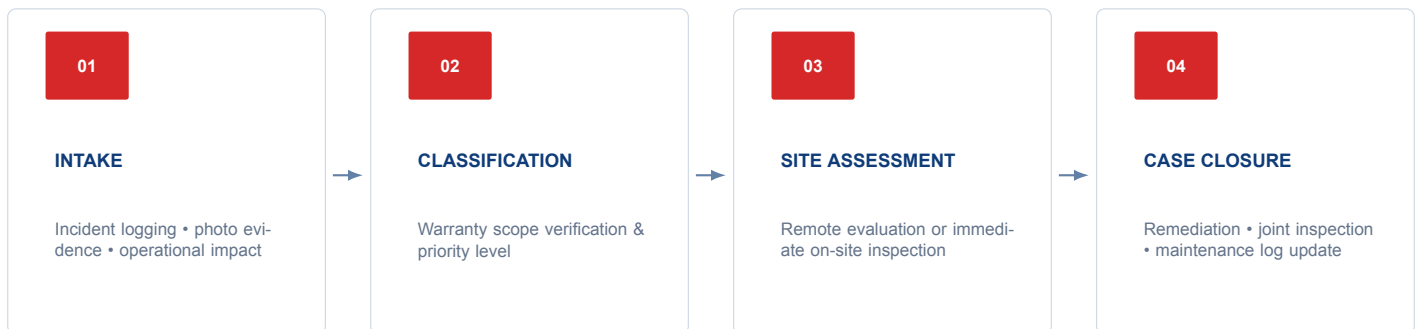

Term and scope established in each contract

SINGLE POINT OF CONTACT — UNIFIED INCIDENT LOG

Hotline and technical email are centralized reception channels. Response time, site inspection and remediation are determined according to priority, contractual conditions and access to the works.

NO VAGUE COMMITMENTS • NO CASE CLOSURE WITHOUT CLIENT SIGN-OFF

POST-HANDOVER SUPPORT PROCESS

THE SCOPE IS DETERMINED ACCORDING TO THE CONTRACT AND HANDOVER MINUTES

STRUCTURAL FRAME

Main frame • bolt connections • protective coatings

BUILDING ENVELOPE

Roofing • wall cladding • gutters • expansion joints

MEP & FIRE SYSTEMS

Equipment • system integration • operation records

CENTRAL SERVICE DESK

INTAKE → SITE ASSESSMENT → REMEDIATION → FORMAL CLOSEOUT

Ecosystem & Corporate References

Selected corporate ecosystem and financial references

CONNECTING CAPABILITIES • CREATING SHARED VALUE

Brand marks are displayed for ecosystem reference; contractual relationships and partnership status are verifiable via valid legal dossier.

CORPORATE ECOSYSTEM

ENTERPRISE ECOSYSTEM

FINANCIAL REFERENCES

REFERENCE FINANCIAL INSTITUTION

COLLABORATE FOR BETTER DELIVERY

Connect expertise, resources and financial capability to the project.

PARTNERSHIP BUILT ON TRUST

TAN THANH CONG
TECHNOLOGY CONSTRUCTION JSC

COMPANY PROFILE • 2026

INDUSTRIAL DESIGN • BUILD • DELIVERY

BUILDING TOGETHER LASTING VALUE

Tan Thanh Cong partners with clients from concept and design through construction and handover.

TAN THANH CONG TECHNOLOGY CONSTRUCTION JOINT STOCK COMPANY

INTEGRATED INDUSTRIAL GENERAL CONTRACTOR • GRADE II CAPABILITY
